Forecast for Monday 02 May 2022

Weather: A mostly cloudy, but probably dry start to the morning with some patchy cloud on summits. Bright or sunny intervals developing but also some scattered, slow-moving showers. Becoming mostly cloudy again by the evening with further light rain or showers. Light winds throughout.

Chance of cloud-free hill tops above 600m: 40% chance during the morning, increasing to 90% by the afternoon.

Low cloud and visibility: Patchy cloud at 400-500m during the morning temporarily covering summits. Cloud gradually lifting above the summits in the afternoon, although cloud bases may temporarily lower onto the summits in any heavier showers. Visibility will be good or very good, away from the cloud, but falling to moderate or poor in rain and showers.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Difficult conditions at first on Monday, with occasional hill fog at height before improving later. Surfaces may be slippery underfoot following any showers. Despite cloudier skies, sun screen is advised when spending any length of time on the peaks at this time of year. UV levels will be moderate.

Recent rainfall: measured at Cat & Fiddle: altitude 511m

Forecast for Tuesday 03 May 2022

Weather: Rather cloudy, with patchy light rain and drizzle at times, overnight. Similar conditions into Tuesday morning, although the cloud will gradually lift and break to give occasional brighter spells, but also some scattered showers. Cloud and outbreaks of rain, perhaps heavy, will arrive from the west overnight.

Maximum wind: East to northeasterly 10-15mph at first, becoming south to southeasterly at 5-10mph during the day.

Chance of cloud-free hill tops above 600m: 10% chance at first, increasing to 80% during the day, possibly lowering again later in the day, with the arrival of the rain from the west.

Low cloud and visibility: Extensive cloud at 400-500m during the morning, gradually lifting above the summits during the afternoon, but temporarily lowering onto the summits in any showers. Extensive cloud at 400-500m likely during the evening and overnight.

Temperature: **Valleys:** Plus 8 Celsius, becoming Plus 14 Celsius.
At 600m: Plus 4 Celsius, becoming Plus 8 Celsius.
Freezing level: Above the summits.
